

Hi, I am Liesbeth Aerts.

I study dementia at UNSW in Sydney. I love talking and writing about science as much as doing research. Follow me on Twitter or get in touch to join the conversation.

have been looking for cool creative
mples of websites that do this “multiple
versions of myself bit” a bit
eractive. Maybe my brain in 4 parts?
I don't know...]
iet te druk, wel strak, maar origineel;
elangrijk: alles moet in twee talen komen

Research

My research at UNSW aims to improve the timely diagnosis of cognitive impairment and dementia, but my background is in molecular neuroscience. I believe it is important to connect clinical observations and biochemical findings.

Find out more about my work via ResearchGate.

My publications

Research
papers

Reviews and
book chapters

Meeting
presentations

I love to share my passion about science with others. I talk, tweet and blog, discussing neuroscience or more general research topics with all kinds of audiences. [Dit moet meer een blog/portfolio achtige pagina worden; waar je mss kan sorteren op publiek en dan een selectie te zien krijgt ofzo; (dmv foto'tjes??); of selecteren op medium (radio, krant, events) sommige overlappen uiteraard]

Scientists

- Organisation of student symposia
 - VIBes at VIB
 - Queen Square at UCL
- Guest blogging at Nature jobs
- Writing for VIB news

Clinicians

Building online platforms with diagnostic tools for dementia

Patients

- Volunteering at Demoucelle Parkinson Charity
- Co-organising 'Patients meet Scientists'
- Talk about Alzheimer's research to people living with dementia

Society

- Co-organising Biotechday
- Flemish press
- blogging at #meisjes en wetenschap
- EOS
- ABC radio

Kids

- Kids University at KU Leuven
- 'Wetenschap op Stap' bringing science to the classroom

Writing & editing

I write about science and doing research (link terug naar Outreach en Advocacy).

I also help others to communicate their research findings. Via 'Highlight science writing' I provide writing and editing services for researchers around the world.

[=> dit moet dan naar Highlight linken?]

Advocacy

As a young researcher, I think it is important to be part of the debate that shapes science and academic research.

Proefdieren

Correcte
berichtgeving

Research funding

hetzelfde met dit onderdeel, moet
een beetje iets portfolio achtig
worden? met dan itempjes die
ergens naar doorlinken?
